What Does Waterproof Mean?

This is a summary of the international standard **IEC 60529 – Degrees of Protection Provided by Enclosures**

IP Code:	Protected against:	at Aquapac we call this:
IPX1	Vertically falling water drops	Rainproof
IPX2	Vertically falling water drops – enclosure	Rainproof
IPX3	Water falling as a spray falling at any angle up to 60° from vertical	Sprayproof
IPX4	Water splashing from any direction	Splashproof
IPX5	Water jets – water projected at all angles through a 0.25in/6.3mm nozzle	Stormproof
IPX6	Powerful water jets – water projected at all angles through a 0.49in/12.5mm nozzle	Stormproof
IPX7	Protected against immersion for 30 minutes to a depth of less than 3ft/1m	Submersible
IPX8	Protected against continuous immersion to a depth of 30ft/10m (see below)	Submersible

When we patented the AQUACLIP sealing system it was submitted for independent testing. The IPX8 testing was for 30 minutes at the equivalent of a depth of 30ft/10m.

Some of the Aquaclips proved waterproof at very much greater depths. Our Keymaster case for example tested IPX8 to 165ft/50m.

What Does The Warranty Cover? And What Does It Not?

- It covers defects in materials or workmanship. It does not cover defects caused by accident, animal attacks, neglect, normal wear and tear, improper care, or failure to follow our written directions (available on our website at www.aquapac.info).
- It does not apply if examination or testing show that an alleged defect does not exist.
- It covers this product only, and not any items you may put inside this product.
